KOSMICA ELEKTRA

La prima rete di persiane al mondo

Orientare Bene significa migliorare la qualità della vita in casa.

Le caratteristiche estetiche, tecnologiche e funzionali della persiana **KOSMICA** rappresentano quanto di meglio è, oggi, possibile ricercare sul mercato internazionale. La forma affusolata delle lamelle, priva di parti sporgenti e spigolose, adatta ad ogni ambiente, sicuro e facile da pulire, è la sintesi mirabile del rispetto della tradizione e dell'innovazione.

KOSMICA e l'orientamento totale nelle tre dimensioni.

Con un solo chiavistello l' **ORIENT-TRE**, è possibile ribaltare completamente più di 100 lamelle (Asse Y), trasferire il movimento in orizzontale tra un pannello persiana e l'altro (Asse X), manovrare la persiana a distanza e in profondità (Asse Z). Queste caratteristiche consentono la massima regolazione della luce e dell'aria, in ambiente, permettono la visuale anche verso l'alto sempre nel rispetto della privacy riducendo la necessità di spalancare le persiane, agevolando tutte le manovre soprattutto nelle persiane alte o con molte ante. Le costole flessibili su molle inox, ne garantiscono l'antigrippaggio ed il funzionamento stabile nel tempo.

SEK è l'unico sistema antieffrazione orientabile su tre Assi, acquistabile in componenti e con i quali il serramentista può costruire, da solo e facilmente, una persiana **KOSMICA** con vari livelli di sicurezza e prezzi sempre più competitivi.

Con il **KIT ELEKTRA** tutte le versioni sono regolabili con centralina con pulsanti e con telecomando.

Da sempre **KOSMICA** mantiene i costruttori di persiane nell'orbita della qualità, al riparo da pericolose meteore. Ora le ultime novità ne fanno l'indiscusso punto di riferimento del settore, vera e propria garanzia di design e funzionalità.
